

MUHAMMAD IMRAN

Faisalabad, Pakistan | imranusman1710@gmail.com | +923111593570

PROFESSIONAL SUMMARY

Motivated Software Engineering graduate (Class of 2026, NUML Faisalabad) with hands-on basic experience in game development, AI integration, and the full software project lifecycle. Proficient in Python, C++, Java, HTML/CSS, Linux, and DevOps practices. A quick learner and detail-oriented problem solver who adapts fast to new tools and technologies. Proven ability to work in teams and deliver functional software solutions. Eager to bring fresh energy and technical skills to a dynamic development team.

EDUCATION

Bachelor of Science in Software Engineering (BSSE)

Completed – July 2026

National University of Modern Languages (NUML), Faisalabad, Pakistan

CGPA: 3.05/4.0

Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Software Engineering, Database Systems, Operating Systems, Artificial Intelligence, Computer Networks

F.Sc Pre-Engineering

2020–2022

Students' Inn College, Faisalabad, Pakistan

INTERNSHIP EXPERIENCE

CodeAlpha — DevOps Internship (Remote)

1 Month

- Completed a remote one-month DevOps internship with CodeAlpha, gaining hands-on exposure to CI/CD practices and automation workflows
- Built and configured a CI pipeline using GitHub Actions to automate build and test steps on code changes
- Wrote and maintained YAML workflow files to define automated jobs triggered on push and pull-request events
- Used Git/GitHub for version control and VS Code as the primary development environment throughout the internship
- Applied core DevOps fundamentals including automation, continuous integration, and basic deployment workflows

PROJECTS

3D Exploration Action-Adventure Game | Final Year Project | Technologies: Godot Engine / AI Pathfinding

- Designed and developed a fully playable 3D action-adventure game with exploration mechanics, level design, and player interaction systems
- Implemented core gameplay features including character movement, collision detection, and game state management
- Applied object-oriented programming principles to build modular and maintainable game architecture
- Collaborated with team members throughout the full software development lifecycle from planning to deployment

CI/CD Pipeline with GitHub Actions | Academic/Personal Project | Technologies: GitHub Actions, YAML, Git, VS Code

- Designed and implemented a CI pipeline using GitHub Actions to automate build and test workflows
- Configured YAML workflow files to trigger automated jobs on code push and pull requests
- Applied Git/GitHub version control best practices to support collaborative, automated development
- Used VS Code to write, debug, and manage pipeline configuration files

SEO Optimization for Personal Portfolio Website | Self-Initiated Project | Technologies: HTML, Google Search Console, On-Page SEO

- Applied on-page SEO techniques including optimized meta tags, title tags, header structure, and image alt text
- Conducted basic keyword research and used semantic HTML to improve search engine indexing
- Used Google Search Console to monitor indexing status, search performance, and site analytics
- Improved page load speed and mobile-friendliness in line with SEO best practices

Manual & Functional QA Testing — E-Commerce Website | Academic Project | Technologies: Manual Testing, Test Case Design, Bug Reporting

- Performed manual functional testing on e-commerce features including cart, checkout, and product filtering

- Designed test cases and test scenarios to validate expected behavior and uncover defects
- Documented bug reports with clear reproduction steps and severity levels
- Conducted basic regression testing after fixes to confirm application stability

AI Voice Command Tool | *Academic Project* | *Technologies: Python, Speech Recognition API, NLP*

- Developed a basic AI-powered voice command tool capable of recognizing and executing spoken instructions
- Integrated speech recognition libraries and natural language processing techniques to interpret user input
- Implemented command-response logic enabling hands-free interaction with the software interface

E-Commerce Website | *Academic Project* | *Technologies: HTML, CSS, JavaScript*

- Designed and developed a fully responsive e-commerce website with product listing, shopping cart, and checkout interface
- Implemented dynamic product filtering and search functionality using vanilla JavaScript
- Built interactive cart system with add/remove items, quantity updates, and real-time price calculation
- Applied modern CSS techniques including flexbox and grid for clean, user-friendly layout structure
- Ensured cross-browser compatibility and mobile-responsive design principles throughout development

Personal Portfolio Website | *Self-Initiated Project* | *Technologies: HTML, CSS, JavaScript*

- Created a personal portfolio website showcasing skills, projects, and professional background in a clean modern layout
- Implemented interactive UI elements including navigation menu, project filtering, and contact form validation
- Designed responsive grid-based project gallery with hover effects and smooth scrolling navigation
- Optimized website performance and accessibility across desktop, tablet, and mobile devices
- Deployed and hosted the portfolio to demonstrate real-world web development and deployment workflow

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, JavaScript, HTML, CSS

Tools & Technologies: Git, GitHub, GitHub Actions, YAML, Linux (CLI basics), Visual Studio Code, Eclipse, Godot, DevOps, Google Search Console

Concepts: Object-Oriented Programming, Data Structures, Software Development Lifecycle (SDLC), Agile basics, AI/ML fundamentals, DevOps fundamentals, SEO Fundamentals (On-Page SEO, Keyword Research), Software Testing & QA (Manual Testing, Test Case Design, Bug Reporting)

Soft Skills: Teamwork, Problem Solving, Communication, Time Management, Quick Learner

ADDITIONAL INFORMATION

- Languages: Urdu (Native), English (Professional Working Proficiency)
- Availability: Immediately available for full-time roles — graduated July 2026
- Open to roles in software development, web development, game development, AI/ML, DevOps, SEO, QA/Testing, and related IT/Software fields
